Syngo Native USEFUL INFORMATION

Friday, September 18, 2020 9:24 AM

Administrator cmd	VA30A: runas /user:syadmin cmd syadmin password: admpwd4med VA20A: runas /user:administrator cmd administrator password: admpwd4$med
API (Customer)	C:\Somaris\site\control\UMAS\Site\Wav
API (Default)	C:\Somaris\site\control\UMAS\Modality\Wav
Bios Password	GO -> 29$03$2017 X.cite -> Intel
Camtasia Video	H:\SiteData\UserData
Change Host Name	from admin cmd: 1. c:\somaris\deploy\utils\Install\XPackInstaller\StopSomarisProcesses.cmd 2. c:\somaris\deploy\utils\install\initialconfig\InitialConfig.cmd
Change System Time	from admin cmd type: timedate.cpl
Current Configuration	C:\Somaris\site\control\UMAS\GantryConfig\CurrentConfig
DB Reset	from admin cmd: C:\Somaris\deploy\utils\ResetDB Logfile gets created under c:\somaris\log\install !! This reset seems to cause an Error in the way the SQL Database does its recovery model -> it sets it to "full" instead of "simple" -> therefor causing the D: partition to fill up with logs until is full.!! -> SKB0117184  More detailed Info on the issue that resetDB causes is explained in SKB0117092
Disable Autologin	from admin cmd: C:\Somaris\deploy\utils\Disable_autologon.cmd
Disable Kiosk Mode	Select: "Tab"+"Delete"+"+" keys: VA30 Username: syadmin Password: admpwd4med VA20 username: administrator Password: admpwd4$med
Disable Password Expiration on Tablet:	from admin cmd: wmic useraccount set passwordexpires=false
Disk Management	from admin cmd: diskmgmt
Expert Mode for Service Pack installation	Disable Kiosk Mode, just before the Install window -> then press the key combination <CTRL> + <SHIFT> + <ALT> + <E>
Export (Backup)	S:\Service\ExpImp
Export Scan Protocols	H:\SiteData\ProtocolManagement\ExportedScanProtocols
Extract Files	C:\Somaris\site\service\extract
Firmware Versions	C:\Somaris\site\control\UMAS\Firmware\select subfolders
ICS Tables	S:\datastore\icstable
Import (Restore)	S:\Service\ExpImp
Import Scan Protocols	H:\SiteData\ProtocolManagement\ScanProtocolsForImport
IRS HD Information	from IRS remote console admin cmd prompt: wmic diskdrive get Name,Manufacturer,Model,Serialnumber,Interfacetype,Mediatype
IRS Logs	C:\Somaris\site\service\extract
IRS Rem. Desktop Connection	IRS: 192.168.184.2 Login: administrator Password: IrsP30..IrsP30..
IRS Remote Console	Login: IRS Password: Rem4!RS
LCM Life Cycle Management	Allows you to look at processes/stop or start them. Disable Kiosk. From normal cmd prompt: C:\Somaris\bin\syngo.Common.LCMService.exe
License + License key file	C:\Somaris\site\config\Licensing
Logfiles	H:\Store\log -syngo*.zip Be aware these logs need a not yet available viewer!
MAS Logs	H:\TraceView – umas*.log (for actiMAS or iMAS)
Message Viewer Export Path	C:\Somaris\OperationalManagement\Autoreport\autotransfer\CT_11061648*.gz
Monitor Setup from admin	cmd: C:\Somaris\bin\H.Infrastructure.Installation.MonitorSetup.exe from meduser cmd for windows monitor settings: desk.cpl
Protocols	C:\Somaris\site\protocols - subfolders
Recovery Image	S:\Somaris\Service\Recovery UP To VA30 (ICS/IRS available)

	Starting from VA30_SP2 (only ICS available -> no more IRS Image possible)
Reference Images	from Patient Browser/Import then follow path: H:\SiteData\UserData\ReferenceImages or I:\ReferenceImages Select all “ImageQualityTests” images then Import. @Patient Browser - Patient “Image Quality Tests - 3D Test” contains smpte pattern (3D Ref 3) and monitor setup image (3D Ref 1).
Robo Copy	from admin cmd: (For additional information ref. Robocopy.pdf by TDC - BBF) robocopy s:\service\expimp<space> f:\<space>/e robocopy f:\<space>s:\service\expimp<space>/e f: is the external usb drive letter that you use.
Savelog	H:\TraceOutput - Savelog*.zip
Screenshots	H:\SiteData\UserData\SreenShot
SD_Store	S:\Service\sd_store
SRS Full Access	User: medadmin Password: admpwd4med Remote Admin Password: admpwd4$med
SSH Key Existence Check	from Windows Explorer navigate to: C:\Somaris\site\control\UMAS\.ssh Open “authorized keys” with notepad -> should see 8 lines (iMAS, TCB, GCB, 5 SiDaNet) Alpha -> should be 14
Start TeamViewer without Syngo UI	from cmd: C:\Somaris\bin\syngo.PresLogic.OPM.SrsBase.RemoteConnectionSupport.exe
Sync Files manually	ICS/IRS from admin cmd: C:\Somaris\bin\CT.Infrastructure.CustomerSupport.SyncWithIRS.exe -xpack -backup -recovery
System Data Info from IRS remote console	G:\BACKUP.ICS\ParameterSync\SyncSystemData.xml
System Management Log	C:\sysmgmt\Log
Table Load Modify	C:\Somaris\site\control\UMAS\Site\Tables
Tablet Passwords	Standard User Rights Password: Go (if not changed by customer) Local Administration Rights Password: password
Tube History_extract	C:\Somaris\site\service\extract
XPACK Install Logs	C:\Somaris\log\install
Netshare to IRS	In a Windows Explorer window type: \\192.168.184.2\q$ to connect to the IRS Service partition Or \\192.168.184.2 for the shared folders to the ICS User: administrator PW: **IrsP30..IrsP30..**
Ping (Loaded)	Ping n 10 65500 192.168.184.2
Deactivate Device Guard	C:\Somaris\deploy\utils\DeviceGuard_Configuration.cmd -disable

Password List

Donnerstag, 1. Oktober 2020 08:07

3D Camera - Remote Desktop	User: **CICUser** or **CICAdmin** PW: **ADMpwd44$med**
Bios Passwords	GO: **29$03$2017** X.cite: **Intel** Other Computers: **Intel** MMWP: **pwd4leo** ICS: **intel** Tablet (Somatom GO): **29$03$2017**
Remote Desktop to IRS	1) VA40 and >VA40 Connect to the IRS with... START - Program - Accessories - Communications - Remote Desktop connection A log on menu appears: User:" **irs** " Password: " **IrsP30..** " (do not forget the two dots after IrsP30) Remark: User name "**irs**" is valid for WindowsXP (VA40) "**Administrator**" is valid for Windows7 (>VA44) ---------- (2) Connect to the IRS with Internet Explorer... - open Internet Explorer in admin mode (runas administrator or from Escape To OS) - enter the KVM IP address (192.168.184.12) on IE address bar KVM login page displayed username : **super** password : **pass** click the "Remote console" on KVM setting page, left side top icon now IRS remote desktop can be accessed. BIOS check during booting (before startup Windows) cannot be used via RemoteDesktop (192.168.184.2) directly but via KVM checking **Remote desktop old Systems:** User: **Administrator** PW: **IrsP30..** **Remote Console VA40 and higher:** User: **REMOTEIRS** PW: **REMOTEIRS**
Somaris 5 and older Somaris 7	Username: **administrator** PW: **admpwd4$med** Username: **meduser** PW: **meduser1** Username: **BRadmin** PW: **pwd4Backup!**
Somaris 7 (VE62 and higher)	Username: **Syadmin** PW: **ADMpwd44$med** Username: **meduser** PW: **$USER$pwd45med$** **More info on Default Passwords and how to handle them with VB10 and higher can be found in KB SKB0103725** IRS connection via Remote Desktop Connection "mstsc" RUN -> "mstsc" Connect to IRS via \\192.168.184.2\ User: **Administrator** PW: **IrsP30..IrsP30..**
UPS GXT4 AlOn Liebert	Admin Password: User: Liebert PW: Liebert
